## SUMMARY

I am a prospective software engineer! I am pursuing computer science @UWO, expecting to graduate in 2026. I am seeking a 2023 summer internship in software engineering. Have a nice day!

## EXPERIENCE

### **Adventures in Science (AIS) Mentee**

University of Toronto

October 2021 - May 2022

AIS is a community outreach group run by science students at the University of Toronto. They mentor high school students to deliver a science lesson to an elementary or middle school class. "If you cannot explain something in simple terms, you don't understand it. The best way to learn is to teach." - Richard Feynman My team and I made an interactive lesson on Artificial Intelligence & Space: I did research and explained difficult concepts in AI and Space to my groupmates to create the final video. I answered challenging questions in a fun, engaging and simple manner for the grade 8 class during the live session. We covered: • Automation • Machine learning • Deep learning • Natural language processing • Computer Vision • Astronomy • Cosmology

## EDUCATION

### **Western University**

2022 - 2026

*Bachelor of Science - BS , Computer Science*

### **albert Campbell Collegiate institute**

2018 - 2022

*OSSD , n.a*

## SKILLS

- JavaScript
- Programming
- Problem Solving
- HTML
- Interpersonal Skills
- Software Engineering Practices
- Computer Science
- Time Management
- Figma (Software)
- Cascading Style Sheets (CSS)

- HTML5
- Python (Programming Language)
- Java
- Research
- Project Management
- Project Planning
- Teaching
- Communication
- Public Speaking
- Teamwork
